

WARRANTY TERMS

FOR ENERGY STORAGE SOLUTIONS

LV Battery System

After-sales service and Limited warranty letters

End User Definition

An End User (hereinafter referred to as "Buyer") is the individual or entity who puts the Products into operation for the first time in a manner authorized by Dyness.

Authorized Seller

Authorized Sellers include Agents, Distributors, Partners, etc. authorized by Dyness.

1 Purpose

The Primary purpose of the Limited Warranty Letters section is to clearly define matters related to the warranty policy of the Products. The Primary purpose of the after -sales Service section is to clearly define precautions for the use of the Products.

2 Applicable products

BX51100 ESS units (hereinafter referred to as "Products") purchased from the Authorized Seller and installed in South Africa only from January 1st, 2024.

3 Product Warranty

Warranty start date definition

The Warranty Period shall commence from the earlier of:

- (1) the date of when the first installation of the warranted product is completed.
- (2) 180 days after the date of shipment from Dyness Digital Energy Technology Co., LTD.

Warranty Period

The Seller provides a standard five-year product warranty period from the Warranty Start Date, subject to customer registration on the Dyness official website: <http://www.dyness.com/sign>, and obtaining Dyness's official approval. Dyness provides a full warranty during the standard five years' product warranty period from Warranty Start Date, covering all major components and labour costs, subject to the exclusions and limitations set out below. And extended five years' warranty excluding BMS and labour charges.

Note: Products are unable to protect themselves from deep discharge/charging without communication connection with the storage inverter they work with. For Products used without communications, or in mobile vehicles such as recreational vehicles (RVs), or camp and marine applications, the warranty period is three (3)

years from the Warranty Start Date, contingent upon customer registration on the Dy Ness official website and obtaining Dy Ness's official approval. Regarding self-discharging degradation, 180 days after ex-work is ensured.

4 Performance Warranty

Dy Ness provides a ten-year performance warranty or up to 6000 cycles, whichever occurs earlier, for purchases made from the warranty start date..

5 Exclusion of Warranty

Damage to the Products resulting from any of following activities is not covered by this Limited Warranty:

- (1) Without payment to the Seller, the Buyer may pay the unpaid amount to the Seller in support of the warranty claim under the circumstances that the Seller has the right to refuse the warranty request in accordance with this clause.
- (2) Not complying with Dy Ness's official user manual of the product and "Appendix 1 - Usage and Transportation requirements".
- (3) Product damage caused by modification, alteration, disassembly, repair or replace maintenance and other services conducted by personnel unauthorized by Dy Ness.
- (4) Damage or defect arise due to the buyer's unauthorized use of his own design, materials, mixed, function changed or service to the Products.
- (5) Product damage and defect caused by buyer's improper use, mixed-use, misuse, abuse, which non-conforming with User Manual.
- (6) Appearance damage, deformation, abrasion, stain, rust, mildew, or similar external influences caused by the buyer during use.
- (7) Improper transportation, storage, installation, wiring and use with faulty or incompatible devices by Buyer. If Buyer fails to use the original packaging materials provided by Seller during the transportation of the equipment, the Products damage or failure shall not fall under the warranty scope of the product.
- (8) The model number, nameplate or product serial number of the product has been altered, erased or unrecognizable or the tamper-evident logo has been arbitrarily damaged.
- (9) Products suffered any external influences including unusual physical, natural force, electrical stress (power failure surges, inrush current, lightning, flood, fire, accidental breakage, etc.)
- (10) Product damage caused by external force, force majeure (causes of natural disasters such as unforeseeable, unavoidable and insurmountable objective

events, including but not limited to war, civil war, strike, riot or other activities intervened by government, terrorism, war, riots, strikes, unavailability of suitable and sufficient labor or materials and other events which are out of control of Dyness) or other third party.

- (11) Removal and reinstallation at another place from the original installation without the written confirmation from Dyness.
- (12) Damage of Products arise due to renewal of the national or regional laws or regulations.
- (13) Product damage and defect caused by End User deliberately or by willful act.
- (14) Use of an incompatible inverter, rectifier or PCS.
- (15) Products failure is not reported to Seller or Dyness Authorized Service Partner within 2 weeks of appearance.
- (16) Purchase and installation of the Product in an area other than the local area.
- (17) Warranty period specified above has already expired.

6 About Service Products/Parts

Fault Handling

- (1) If the product fails, the Buyer shall cooperate with the Seller to obtain the faulty equipment usage information, including but not limited to: faulty equipment serial number, working temperature, usage mode, supporting energy storage inverter manufacturer/model/specification, power consumption equipment power information, PV system configuration information, fault phenomena, operating procedures, battery operation logs, etc.
- (2) When both parties agree that the product belongs to the warranty scope, Dyness or Dyness authorized sellers can repair or replace the non-conforming products or parts. Before repairing or replacing the non-conforming products, the Buyers shall confirm with the Dyness or Dyness authorized sellers in writing and provide the serial number of the failure equipment and the serial number of the spare parts to be installed in time. The warranty period of the replacement product shall follow the remainder of the original product warranty period.
- (3) If the two parties disagree with whether the faulty equipment meets the warranty conditions, the products may be tested jointly by the ways approved by both parties, or the products shall be submitted to the third-party testing institutions recognized by both parties. Both parties can provide reasonable opinions on the test methods, basis and conclusions. The testing fee shall be borne by the Buyer first. If the testing result proves that the product meets the warranty conditions, the Seller shall pay the transportation fee and testing fee generated in full to the

Buyer, and assume the responsibility for the faulty equipment warranty.

Out of Warranty

(1) If the product is out of warranty or not covered by the warranty, Dy Ness may (in its discretion) provide certain after-sales service to Original Buyer, but all the costs and expenses, such as parts, labour costs and travel expenses, shall be borne by Original Buyer, Please refer to the after-sales service policy document for details.

7 Claim payment policy

Dy Ness reserves the rights to refuse product warranty claim for lacking proper documentation and information.

Claims under this Warranty must be made by notifying the Seller from whom Products was purchased within 2 weeks of defects' appearance.

For a Warranty Claim to be processed, it must include but not limited following items:

- (1) Proof of the original
- (2) Description of the alleged defect(s) from authorized service center
- (3) The relevant Product's serial number and the start date of the warranty

Buyers who are unable to contact the Seller from whom Product was purchased should contact Dy Ness Digital Energy Technology Co., LTD. at the Contact Us Section of the Website: <http://www.dyness.com>

Email: service@dyness-tech.com

Fax: 029 8954 0338

8 Applicable Law

The Warranty is subject to the local legislation and regulations.

The company reserves all rights for the final explanation of the warranty terms.

Appendix 1

Usage and Transportation requirements

This product includes Lithium iron phosphate battery and the Accessory Components. In order to ensure that the buyer is entitled to full warranty policy, the following clauses should be strictly observed in the transportation and use of products. The product failure or damage caused by violation of the following requirements is not covered by this Limited Warranty.

1 Operating environment requirements

- Working temperature: -20~55 °C
- Working humidity: 5%~85% RH
- Altitude: <4000m
- No conductive dust and corrosive gas
- Installation location should be away from the sea to avoid brine and high humidity environment.
- The ground is flat and level.
- There is no flammable explosive near to the installation places.
- Keep away from dust and messy zones, water source and heat source, prevent equipment from entering water and overheating.

2 Storage environment requirements

- Short-term storage environment:
Within 3 months of temperature range is -20~40°C.
Relative humidity <85%RH.
No corrosive gases.
- More than 3 months long-term storage environment:
temperature range for -10~35°C
Relative humidity <65% RH No corrosive gases
- If long-term storage is required, it should be recharged every 6 months, and no less than 80% of SOC should be charged.
- Keep away from dust and messy zones, water source and heat source, prevent equipment from entering water and overheating.

3 Transportation requirements

(1) When the product is transported separately, the individual products should be transported with the original packaging materials of the Seller. If long-distance transportation such as sea transportation is required, additional packaging measures should be taken to ensure the safety of transportation. The product stack in transportation does not exceed 6 layers.

- (2) If the product does not use Seller's original packaging material transportation, Buyer shall fully consider the risks of vibration, drop and collision in the transportation process, and adopt adequate product protection measures.

4 Equipment installation requirements

1	Visual inspection	<p>Check the appearance for damage and check the attachment variety and quantity according to the packing list.</p> <p>Verify that the device is off state.</p>
2	Electrical specification confirmation	<p>The rated working voltage of the energy storage PACK is 51.2V for BX51100. It is essential to verify that the storage inverter parameters match the battery voltage. Additionally, ensure that the maximum charging and discharging currents designed by the system meet the specification requirements of the energy storage PACK. Furthermore, ensure that the external power supply does not generate surges that could damage the battery or BMS.</p>
3	Connection	<p>When connecting the power line, pay attention to the positive and negative electrodes to avoid reverse connection and short circuits. It is forbidden to connect the battery directly to AC power. The battery can be used in parallel but not in series. Do not mix batteries with other factory batteries or other types of batteries. Ensure that the battery is reliably grounded, with a grounding resistance of less than 1 Ω.</p>

5 Equipment Use

1	Charging	<p>The battery's long-term maximum continuous charging current should be $\leq 0.75 C$, and if the battery capacity is empty, please charge it within 48 hours.</p>
2	Discharging	<p>The long-term maximum continuous discharging current of the battery should be $\leq 1C$, and the maximum depth of discharge (DOD) of the Battery PACK should not exceed 90%.</p>
3	Cycles	<p>Cycle life measurement conditions: Ambient temperature: 25~30°C Initial battery temperature from BMS: 25~30°C Charge & discharge rate: 0.2C DOD settings: 80%</p> <p>Each cycle's interval time should be more than 2 hours, and there should be no more than 700 cycles per year.</p>

4	Move	To remove the battery, disconnect the external power supply and turn off the switch.
5	Maintain	Do not open the battery shell or dismantle any components without obtaining written authorization from the Seller.
6	Fire emergency	In case of emergency, only use dry powder fire extinguishers for firefighting purposes.
